Notice

The Express Rail Link – Temporary Diversion at Entrance A of Nam Cheong Station and Temporary Traffic Management Scheme at Sham Mong Road

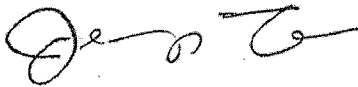

To facilitate the advance work for foundation removal & re-provisioning for the Express Rail Link Project, the first phase of the temporary modification works at Entrance A of Nam Cheong Station will be carried out. Temporary diversion at Entrance A of the Station will be implemented starting from **mid June 2010**. The existing route to the Station Concourse via Entrance A will be subject to temporary relocation with details as follows:

A temporary entrance together with access paths will be set up near the existing Entrance A of Nam Cheong Station (please refer to the attachment). Clear signage will be erected while our Station Ambassadors will also provide assistance to passengers at the early stage of the diversion. Existing pick up/drop off area for the disabled fronting Entrance A will be retained with temporary access path to the Station. The diversion is scheduled for four months until **Oct of 2010** when the second phase of modification work commences. The details of the second phase diversion will be advised by further notice.

Besides, to facilitate the advance work for the underground utilities diversion and foundation removal & re-provisioning, temporary traffic arrangement will be implemented at Sham Mong Road starting from **mid May 2010** for five months. About 100-metre of the slow lane of Sham Mong Road at the south of Tokin Street West will be temporarily closed for the diversion of the pedestrian footpath (please refer to the attachment). During works period, the concerned carriageway and the temporary footpath will be separated by water-filled barriers to ensure road users safety.

We apologise for any inconvenience caused. Should you have any enquiries, please call the MTR Projects Hotline at 2993-3333.
